Sales — Order Checkout

Module: Sales / Orders | QSA Industries ERP — Data Entry Reference

Overview

Create a dealer order with product lines. Stock is checked and prices resolved from price lists.

Notes

- Dealer must be active and mapped to a sales rep.

Fields

Field	Type	Required	Description
Dealer	select	Yes	Ordering dealer (auto for dealer portal).
Product	select	Yes	Sellable product.
Quantity	number	Yes	Positive quantity.

How to feed data

1. Open Sales → Orders → create order.
2. Add product lines and submit; stock and price are validated server-side.

Generated for QSA ERP local reference.
