Production — Runs

Module: Production | QSA Industries ERP — Data Entry Reference

Overview

Record a production run: finished product output, shift, date, raw material consumption and QC verdict.

Notes

- Only passed runs count toward yield.

Fields

Field	Type	Required	Description
Finished product	select	Yes	Sellable finished good.
Quantity produced	number	Yes	Output quantity.
Shift	select	Yes	morning / afternoon / night.
Run date	date	No	Defaults to business date.
Raw materials	lines	Yes	Raw material products + quantities consumed.
QC status	select	Yes	pending / passed / failed.
QC notes	text	No	Required when failed.

How to feed data

1. Open Internal → Production → create run.
2. Fill output, shift, materials and QC, submit.
3. A batch is created; stock movements recorded for materials.

Generated for QSA ERP local reference.
