Sales — Manual Sales Order

Module: Sales / Orders | QSA Industries ERP — Data Entry Reference

Overview

Create a sales order manually for an existing dealer, with custom product lines and unit prices. Does not require a mapped sales rep flow; tagged to the chosen dealer.

Notes

- Sales rep resolved from dealer; falls back to default rep if none mapped.

Fields

Field	Type	Required	Description
Dealer	select	Yes	Existing dealer to tag the order to.
Status	select	Yes	pending / approved / dispatched.
Requested delivery date	date	No	Optional delivery date.
Product	select	Yes	Sellable product line.
Quantity	number	Yes	Positive quantity.
Unit price	number	Yes	Price per unit.

How to feed data

1. Open Sales → Orders → 'Manual sales order' panel.
2. Select dealer, status, add product lines with quantities and prices.
3. Submit; order and lines are created and tagged to the dealer.

Generated for QSA ERP local reference.
